[Portfolio](#) | [LinkedIn](#) | [Github](#)

About Dev:

Passionate and detail-oriented MERN developer with a strong foundation in JavaScript, Node.js, React, and MongoDB. With a deep respect for time-tested coding practices and clean, maintainable code, I build scalable web applications that stand the test of time. I'm committed to writing solid, efficient solutions while continuously learning and adapting to modern tools. Ready to contribute my skills and uphold professional standards in a collaborative team environment.

- Frontend: HTML, CSS, React.js, Next.js, JavaScript, TypeScript, Tailwind,
- Backend: Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT, Firebase
- Tools & DevOps: Git, GitHub, Postman, Vercel, Railway VS Code, Figma,
- Soft skills: Communication, Adaptability, Problem Solving.

PROJECTS

• Cine Otaku [Live Link](#) | [Client Code](#)

This is a web application designed for anime enthusiasts to explore, track, and manage their favorite anime series and movies. It offers a user-friendly interface to browse anime content, view detailed information, and maintain personalized watchlists.

- o Anime Exploration: Browse a vast collection of anime titles with detailed information.
- o Responsive Design: Optimized for both desktop and mobile devices..
- o Authentication via Popup: User can use there Google, Twitter id to authenticate.

Technologies Used: Typescript, ReactTs, Tailwind CSS, Daisyui.

• Coming soon
